

ANNUAL INDEX

The Australian Grapegrower & Winemaker

Nos. 433 – 443 2000

Australian Wine Business®

- Causal attitudes: IRC removes casual employees' protection from unfair dismissal. Michael Tooma. 435:50, 52.
Coming to grips with PAYG and BAS. Chris Taylor. 439:58-59.
Developing vineyard management procedures. Peter Elder. 442:103-105.
Don't dud your employers! Ian Perrett. 442:101-102.
Electrical safety – avoid the shock of penalties. Michael Tooma. 443:73-74.
Employee or contractor – what's in a name? Michael Tooma. 434:51-52.
Establishing cellar door sales – the feasibility. Peter Elder. 443:71-72.
Flying sales and marketing squads to service the wine industry? Simone Allan. 435:49.
GST and the wine business. Leigh Devine. 436:73-74.
How to improve the profitability of your winery business – a review of pricing. Sean Cortis. 441:101-102.
Investment into Australian vineyards with a view toward awareness. Adam Jacobs. 442:93-95.
Managing legal risk in e-commerce for Australia's wine industry. Andrew Davies. 442:96-98, 100.
Prevention better than cure with trade practices law. Frank Lancione. 438:117-118.
Risky business: incorporating the risk management philosophy in your business. Michael Tooma. 441:99-100.
So you want to grow grapes and make wine. John and Janet Stanley. 438:119-120.
The law on occupational health and safety in the vineyard and winery. Shauna Jarrett. 437:66-68.
The squeeze of tax reform on your cash flows. Sean Cortis. 439:55-57.
To market, to market – make sure you have a liquor licence. Shauna Jarrett. 440:99-101.
Vats, tanks and other killers – managing safety in confined spaces. Michael Tooma. 437:63-65.
What a small to medium enterprise (SME) should do if things start to get tough. John Hart. 434:41-44, 46-50.
Who's responsible for your grapes from the vineyard to the winery? Shauna Jarrett. 436:65-66.
Your contractor's safety is your responsibility. Michael Tooma. 433:31-32.

Bird Control (see Pest & Disease Management)

Botrytis (see Pest & Disease Management)

Bottling, Labelling & Packaging

- Environmental legislation affecting the Australian wine industry. Michelle Rasmussen. 439:61-62.
Labels speak volumes. Brian Dalby. 439:66.

Bunch Rots (see Pest & Disease Management)

Clean & Green Issues

- A 'clean and green' product – How do you prove it? Gioia Small. 441:57-59.

Closures

- A word on cork storage in the winery – reducing the risk of cork taint. Sonya Wiley. 439:63-64.
Cork company takes up TCA challenge. Sonya Wiley. 437:48-50.
Factors affecting cork permeability. Geoffrey Skurray, Edouard Castets and Bob Holland. 435:56-60.

Cover Cropping

- Cover cropping and soil organic matter. Graeme Sanderson. 434:33-34.
Sustainable permanent midrow management in vineyards. Jodie Armstrong. 434:36, 38-39.

Crushing & Pressing

- A word on efficient and ecological extraction. Graham Dixon. 438:63, 65.
Crushing and pressing – where did it all start? Jim Irvine. 438:61-62.

Education & Training

- 25 years of wine education at Charles Sturt University. Professor Geoffrey R. Scollary. 438:104.
Education and training providers: choosing the one that's right for you. Libby Boschen. 438:101-102.
Quality has become the focus – the CSU students' Riverina tour 1999. Paul R. Grbin. 433:19-21.
Winemaking and viticultural education at Hawkesbury. Professor Geoff Skurray. 438:106-107.

Esca (see Pest & Disease Management)

Fermentation Technology

- Optimisation of alcohol fermentation by the addition of a specific yeast bio-regulator: impact on fermentation kinetics and on the characteristics of wine. Patrice Pellerin, Renny Lebrun and Lewis Tessarolo. 442:15-19.
Plastic bag fermentation technology – an update. Andrew Hickinbotham. 442:21-22.
The colour – the first impression of a red wine. German Hasselbeck and Siegmund Goertges. 442:25-26.
The next step forward in red wine static fermentation technology. (Product report). Jeff Snedden. 442:28.

Filtration & Clarification

- Addressing concern of edge leakage. (Product report). Carmine Polzella. 436:61.
A revolutionary screen material for horizontal leaf filters. (Product report). Gary Reeves. 436:54, 56.
OenoLogic: tradition and innovation. Sean Wattam. 436:57-58.
Sterile filtration for microbial stability of product. (Product report). Carmine Polzella. 436:61.
The solution to the haze problem is clear. Brian Wilson. 436:51-52.

Flow Equipment

- Positive displacement pumps – an overview. Ron Astall. 433:59-60.
Wine transfer management. Tom Bodycomb. 433:61-63.

Frost

- Advection frost: a case study of the freeze of 27-28 October 1998 and its effects on the vineyards of the Canberra district Part 1: Meteorological aspects. Gavan Cashman. 438:74, 77, 79-82, 84.
Advection frost: a case study of the freeze of 27-28 October 1998 and its effects in the vineyards of the Canberra district Part 2: Vineyard impacts. Gavan Cashman. 439:22-24, 26-27.
Crucial factors to consider in buying wind machines. John Walsh. 438:73.
Crystallising protection ideas against frost. Lindsay Corby. 438:71-73.

Grape Colour

- Ripening grapes to specification: effect of yield on colour development of Shiraz grapes in the Riverina. B.P. Holzapfel, S.Y. Rogiers, K.A. DeGaris and G. Small. 428:24, 26-28.

Grape Production Statistics

- Production of red grapes in South Australia expected to increase 116% in 2003. Justin Ross. 422:27-29.

Grape Varieties

- Alternative varieties: what is their potential in Australia? Gioia Small, Patrick Calabria and Tony Somers. 439:83-85.
Montepulciano – a potentially useful red wine variety for Australia. Richard Ciriaco and Jim Furkaliev. 442:62.
The inaugural Australian Sangiovese Awards. Roderick Bonfiglioli and Stefano DePieri. 435:26-27.
The origin of the cultivar Muller Thurgau – some secrets still remain. Dr. Ferdinand Regner. 441:70.
The viticultural and oenological evaluation of Cabernet Sauvignon, Chambourcin and Chenin Blanc. Richard Ciriaco, Andrew Ewart and Jim Furkaliev. 433:14-17.
The viticultural and oenological evaluation of Durif, Egidola and Emerald Riesling. Richard Ciriaco, Andrew Ewart and Jim Furkaliev. 434:18-21.
The viticultural and oenological evaluation of Fer, Gamay and Ganson. Richard Ciriaco, Andrew Ewart and Jim Furkaliev. 435:14-17.

The viticultural and oenological evaluation of Graciano, Gramon and Harslevelu. Richard Cirami, Andrew Ewart and Jim Furkaliev. 436:20-23.

The viticultural and oenological evaluation of Maccabeu, Malbec and Malvasia Bianca. Richard Cirami, Andrew Ewart and Jim Furkaliev. 438:16, 18, 20.

The viticultural and oenological evaluation of Melon, Merlot and Monerac. Richard Cirami, Andrew Ewart and Jim Furkaliev. 439:16-17, 19-20.

The viticultural and oenological evaluation of Mtsvane, Muscadelle and Nebbiolo Bourgu. Richard Cirami, Andrew Ewart and Jim Furkaliev. 440:91-93.

The viticultural and oenological evaluation of Odola, Orange Muscat and Ortrugo. Richard Cirami, Andrew Ewart and Jim Furkaliev. 441:66-67, 69.

The viticultural and oenological evaluation of Parellada, Perdea and Petit Verdot. Richard Cirami, Andrew Ewart and Jim Furkaliev. 442:57-58, 61.

The viticultural and oenological evaluation of Pinot Blanc, Pinot Gris and Piquepoul Noir. Richard Cirami, Andrew Ewart and Jim Furkaliev. 443:25-29.

Grape & Wine Research

Grapegrowers to be given the tools to make their wine even better. Sonya Wiley. 426:21-22.

MIA project looks at growing grapes to specification. Dr. Bruno Holzapfel. 421: 23.

Grapevine Leafroll Virus (see Pest & Disease Management)

Grape Virus A (see Pest & Disease Management)

Index

Annual Index, 1999. 433:69-71.

Industry Outlook

Short-term adjustment expected within continued longer-term development. Lawrie Stanford. 430:88-90.

Integrated Pest Management (IPM) (see Pest & Disease Management)

Irrigation

An irrigation benchmarking module. Mark Skewes. 442:82-83.

Irrigation scheduling within the reach of even the smallest vineyard operator. Iain Grierson. 442:88-89.

Managing saline irrigation water for grapes. Norm Cross. 442:85-86.

Nutrition and irrigation strategies for sustainability and grape quality. Jessica Wade, Bruno Holzapfel, Markus Keller and Dejan Tesic. 442:77-80.

Legal

Living in harmony with your wine labels. Bruce Drinkwater. 436:82-83.

The warning after. Bruce Drinkwater. 441:12.

Lightbrown Apple Moth (see Pest & Disease Management)

Locusts (see Pest & Disease Management)

Mechanical Harvesting Equipment

Machine harvesting at vintage – some considerations. Bruce Humphery-Smith. 433:56.

Machine over man proving fruitful for winegrape growers. Stuart Auld and Nick Minnas. 433:49-50.

Managing Young Vines

First year vine management investment repays dividends for many years. Peter Scholefield, Garth Swinburn and Ben Robinson. 441:21-24.

The challenges for grapegrowers in establishing young vines. Lindsay Corby. 441:26-28.

Vineyard trials show value of mulches – organic matter for management of young vines. John Buckerfield and Katie Webster. 441:33-34, 36-39.

Marketing

Achieving a better understanding of the offer quality dimension. Peter J. Batt and Helen Wilson. 443:58-60.

Become business masters of your own fate – don't let the French dictate. Peter Gardner. 443:53-56.

Cooperative marketing arrangements in the Western Australian wine industry. Peter J. Batt and Michelle Marshall. 435:53-54.

Distribution channels for small to medium winemakers. Paul Le Lacheur. 443:62-63.

Integrated channel strategy for SME wineries. Steve Goodman. 443:43-46.

Marketing for grapegrowers. Peter Elder. 433:37-38.

Retail wine store tasting as a marketing tool. Paul Le Lacheur. 435:47-48.

The function of price and its longitudinal influence. Peter Gardner. 438:95-97.

The making of a marketer's dream. Ian Kidd. 435:34-35.

Using involvement and brand equity to develop a wine tourism strategy. Larry Lockshin. 443:47-50, 52.

Wine marketing: what's involved? Steve Goodman. 436:67-68, 70.

Mites (see Pest & Disease Management)

Nematodes (see Pest & Disease Management)

Oak

4-Ethylphenol, 4-ethylguaiacol and oak lactones in Australian red wines. Alan P. Pollnitz, Kevin H. Pardon and Mark A. Sefton. 438:45, 47-50, 52.

Oak and the small winemaker. Tim Stevens. 438:43-44.

Organic Viticulture & Winemaking

How to get organic certification and when do you get what? David Bruer. 443:32-33.

Managing young vines for an organic vineyard. David Bruer. 441:30-31.

Moving from conventional to organic to bio-dynamic viticulture: a decade of experience in a successful transition to eco-viticulture. Ludwig Mueller. 436:14-16.

The future of organic wine. John Keep. 442:54-55.

Overseas

Curtin University students benefit from an educational excursion to the winegrowing regions of France. 441:79-80, 82, 85-86.

Environmental characterisation of viticultural sub-regions within Hawke's Bay (New Zealand). Dejan Tesic. 438:25, 27.

People

An outstanding contributor to the science of winemaking (Ray Beckwith). Sonya Wiley. 440:11-14, 16.

Dr. Bryce Rankine reflects on his half-century in the Australian wine industry. (Special report). 435:8-9.

Groomed for success – an Australian makes his winemaking mark in the US (Daryl Groom). Sonya Wiley. 434:25-26, 28-30.

Pest & Disease Management

Agrochemicals available for managing bunch rots. Wendy Allan. 440:46-48, 50-52, 54.

Applying fungicides after harvest – are they worth the effort? Trevor Wicks and Bob Emmett. 436:13.

French Oak Chips

from Arôbois S.A.R.L. Gangnac-Sur-Cère, France

- Quality oak chips from carefully controlled processes
- Providing oak character to good wines which don't justify the cost of oak casks
- Available in a range of toast levels
Samples and prices available from

coopers, vat makers
since 1905

C.A. SCHAHINGER Pty. Ltd.

11 Richard St., Hindmarsh, South Australia

Phone (08) 8346 4487

Fax (08) 8340 0801

Collaboration stimulates *Botrytis* research. Markus Keller. 435:23-24.

Controlling downy mildew and powdery mildew and suppressing *Botrytis*. (Product report). Glen Tucker and Richard Porter. 441:96.

Early detection and diagnosis of Pierce's Disease in Australian grapevines. Jo Luck, Ross Mann, Jane Moran, Violeta Traicevski and Peter Merriman. 440:22-23, 25-26.

Effect of nitrogen fertilisation on the development of phylloxera root damage in laboratory and field trials. Andreas Kopf, Karl-Josef Schirra, Alfons Schropp, Rolf Blaich, Nikolaus Merkt and Friedrich Louis. 440:56, 58-62.

Esca or an esca-like syndrome in the Margaret River region of WA. Dr. Roderick Bonfiglioli. 439:11-13.

Esca or not? Ian Pascoe and Jacky Edwards. 439:14.

Gisborne, NZ, grower develops novel system of bird netting. (Special report). 440:70.

Grapevine leafroll virus type 3 in Roussanne vines. Dr. Roderick Bonfiglioli. 436:24.

Grapevine Virus A is associated with restricted growth in the spring. Bob Symons. 443:17-18.

Grapevine viruses – a SAVIC perspective. Wayne Farquhar and Andrew deLaine. 438:13-15.

Hints for managing pest bird problems in vineyards. Dr. Ron Sinclair. 440:31-32, 34-36.

Integrated strategy succeeds against birds. Gavin Lake. 440:73-74.

Late season control of powdery mildew. T. Wicks, C. Hitch and J. Habner. 434:13-14.

Mites – strategies for control. Kym Ludvigsen. 437:13-14.

Mites – the classic 'who done it?' Martina Bernard, David Braybrook, Pam Hurst, Ary Hoffmann and DeAnn Glenn. 438:28-31.

Netting for vineyard bird control. Lee Duffy. 441:62, 64.

New research on the effect of Phomopsis type 1 on budburst. Belinda Rawsley and Trevor Wicks. 440:36, 38-39.

Resistance of grapevine powdery mildew to DMI fungicides in Australian vineyards. Sandra Savocchia, Belinda Stummer, Trevor Wicks, Robyn Van Heeswijck and Eileen Scott. 440:41-44.

Soil and crop sampling for nematodes. Greg Walker. 440:65-66.

Some facts about locust control in vineyards. Stephen West, Sally-Jean Bell and Ken Henry. 443:20-22.

Towards the biological control of powdery mildew of grapevines in cool climate viticulture in Australia. 440:27-30.

Using Isomate in integrated management of lightbrown apple moth. (Product report). Stephen Sexton. 440:69.

Wild Dog battles birds. Gavin Lake. 441:72-73.

Young vine decline in New Zealand – anatomy of a syndrome. Roderick Bonfiglioli, Mart Verstappen, Fran Edwards, Nick Hoskins, Susan McGregor and Cath Mitchell. 439:86-90.

Phomopsis (see Pest & Disease Management)

Phylloxera (see Pest & Disease Management)

Pierce's Disease (see Pest & Disease Management)

Powdery Mildew (see Pest & Disease Management)

Pruning

Taking matters into their own hands in the name of quality. Sonya Wiley. 442:43-44.

Quality Assurance

Quality assurance management for vineyards – an innovative approach. Gioia Small. 425:19-20, 22.

Quality scheme a world first. (Special report). 425:22.

Refrigeration & Cooling

Automatic temperature control in the wine industry. Gordon Wightman. 441:93.

Winery cooling for the small producer. Bruce Humphery-Smith. 441:89-90.

Winery refrigeration made easy. Noel Ireland and Brian McLaughlin. 441:91-92.

Your call – data loggers provide 'evidence' of energy efficiencies in barrel stores. (Product report). John Gibbons. 441:94-95.

Ripening

Ripening grapes to specification in the Riverina: the second year. K.A. DeGaris, B.H. Holzapfel, S.Y. Rogiers and G. Small. 443:35-36.

Seminars, Symposiums and Conferences

A visit to Paris – the OIV paradox. Bruce Drinkwater. 439:79-80.

Soil Management

Post-plant ripping of vineyards. Ben Brown and Matthew Goodwin. 430:34, 36-37.

Soil management for viticulture – some ideas from the cotton industry. Dr. David McKenzie. 431:27-30, 32.

Taxation and the Wine Industry

Are Australia's wine consumer overtaxed? Nicholas Berger and Kym Anderson. 423:59-61.

GST and WET: How will they affect your winery? Kenton Steicke. 424:66-68.

GST: Is your business ready? Craig Thomas. 424:28.

Wine Equalisation Tax and cellar door/mail order sales. Craig Thomas. 430:29.

Training & Trellising

An update on the Gibson-Schulz system. Rob Gibson. 437:34-35.

The Smart Dyson system – advantages and international adoption. Richard Smart. 437:23-24.

Treated eucalypt posts for grapevine trellising. Dr. Mahabubur Mollah. 437:28-29, 31-32.

Vine Guards

The humble vineguard a decade on – Australians put them to the test. (Special report). 441:41-42, 44-46, 49-50.

What you should know before you buy secondhand vineguards. (Special report). 441:53-54.

Vine Improvement

After the ICVG – vine health certification and the nursery industry: putting research into practice. Roderick Bonfiglioli. 436:41-42.

Beyond 2000: vine improvement into the next century. Jeremy Cass. 436:34-36.

Developments within the Victorian and Murray Valley Vine Improvement Assoc. Deidre Jaensch. 436:37-38.

Fewer grapevine cuttings sold in South Australia in 1999. Wayne Farquhar. 437:45-47.

Increased profitability through the AVIA National Nuclear Collection of Clean Vine Material. Wayne Farquhar and Andrew deLaine. 440:86, 88-90.

Queensland Vine Improvement Association continues to grow. Peter Watters. 436:32.

Rootstocks versus own-rooted vines. Bruce Humphery-Smith. 436:39-40.

The national distribution of grapevine cuttings for 1999. Andrew deLaine. 436:27-29, 31-32.

Western Australian Vine Improvement Association update. J.M. Campbell-Clause. 437:42-43.

Vine Nutrition

Composts in viticulture. Cassandra Scheff. 442:31.

Keeping vines healthy with seaweed sprays. (Product report). Russell Woodward. 440:96.

Quality influences of N and K supply to vines: a nutrient response model. Rocky Renquist and Jeff Reid. 442:32-36.

Vine nutrition and soil biological activity. Gerard Besamusca. 442:38-41.

Vineyard Spraying

Droplet rating chart: a simple way to measure spray coverage and dose of pesticides on grapevines. Geoff Furness. 439:31, 33-36.

Getting pesticide application right: spray volume, deposition and chemical rate requirements for grape canopies. Dr. David Manktelow. 442:46, 48-50.

Getting the dose right: How much is enough and how do you measure it? David Riches, Michelle Warren, Kieran Murphy, Alison MacGregor, Amanda Hill, Peggy Kooij and DeAnn Glenn. 439:39-40.

How much chemical should I put in the tank? DeAnn Glenn, Alison MacGregor and Kieran Murphy. 439:29-30.

New label directions for vine chemicals. Leon A. Radunz. 439:43-46.

Tips on using a spray pole. (Special report). 442:52-53.

Vineyard Tractors

Factors in row width choices. Bruce Humphery-Smith. 435:38-39.

Some useful points to consider when buying a vineyard tractor. Gil McDonald. 435:37-38.

Viticulture

Careful selection of a consultant. Mike Hayes. 440:102-104.

Geographic information systems – a step into the information age. James Taylor. 435:19-21.

Is your yield data trying to tell you something? Stephen Martin. 440:84-85.

Rapid early vine growth depends on soil penetrability. Graham Due. 440: 94, 96.

Weed Control

Herbicide in vines. (Product report). Richard Porter. 438:38, 40-41.
 Maximising viticultural operations through accurate weed control.
 Adam Jacobs. 438:33-34.
 Some practical advice on dealing with weeds in a vineyard. Bruce
 Humphery-Smith. 438:35-36.

Wine & Health

Red wine versus white wine – is there a difference in health benefit?
 Dr. Philip Norrie. 440:17-18.
 Why are my teeth so dark? Paul K. Bowyer. 436:80-81.

Wine Exports

A challenging 12 months lie ahead as Australian wines strengthen
 their place in UK and Ireland. Hazel Murphy. 434:58.
 An overview of the Hong Kong market. Peter Chu. 434:67-68.
 Are you ready to export? Six steps to consider. Geoff Upton. 441:15-16.
 Are you ready to export? – Part 2. Geoff Upton. 442:71-72.
 Australia's wine export prospects in the wake of supply expansions.
 Kym Anderson. 437:53-54, 56-59.
 Canada – a consistently strong and loyal market. Jonathan Scott,
 Kevin Lamb and Marie Ross. 434:60-62.
 Elderton commands the attention of export markets as it increases
 production. Sonya Wiley. 440:79-80.
 Growth in competition – a European perspective. Michael Paul.
 436:43-44.
 If I am ready for export, where can I go for information and
 assistance? Geoff Upton. 443:65-66.
 Japan and other East-Asian markets. Jonathan Scott. 434:63-65.
 Just for the record, an exceptional year in an exceptional decade.
 (Statistical review). 439:49-52.
 Kiwis still heavily favour their local whites but there may be changes
 in the wind. Linda Sheridan. 435:63-64, 66-67.
 Market snapshot: Japan. (Austrade review). 443:68-69.
 Market snapshot: New Zealand – a guide for smaller wineries.
 (Austrade review). 442:73.
 Report from the USA – just look at the figures for 1999! Jan Stuebing.
 434:56.
 Scandinavia – what happened in 1999? Jay Andersson. 434:54-55.
 The German wine market – an overview. Dr. Steffen Maus. 438:89-90, 92.
 The short and medium term outlook for Australia's wine exports.
 Angela Shepherd. 436:46

Winemaking

Investigation of the role of total and free copper in protein haze
 formation. Christelle Besse, Andrew Clark and Geoffrey Scollary.
 437:19-21.
 Malolactic fermentation – no longer a black hole in the winemaker's
 universe (Part 1). Richard Webb. 435:30-31.
 Malolactic fermentation – no longer a black hole in the winemaker's
 universe (Part 2). Richard Webb. 436:78-79.
 Microcel: new fermentation technology for fresh aromatic white and
 rose wine. (Product report). Paul A. Baggio. 433:45-47.
 Persistent wine instability issues. Peter Godden. 443:10-14.
 Problems with different types of TLC sheet for monitoring MLF.
 Richard Webb. 438:57-58.
 Protein stability in white wine – the nuisance of bentonite. Richard
 Webb. 343:10-11.
 Sulfur dioxide analysis by aspiration/oxidation – how not to blow your
 results! Marco Vallesi, Greg Howell and Henk van den Bergen.
 433:40-41, 43-44.
 The advantages and disadvantages of using copper in winemaking.
 Oliver Schmidt. 442:10-12.
 Yeast fermentation quiz: true or false? Lisa Van de Water. 434:72-75.

Wine Regions

Ballarat gears up for extensive growth. Sonya Wiley. 443:38-41.
 Big winegrape project planned in Far West of South Australia. (Special
 report). 441:10-11.

Winery & Vineyard Enterprises

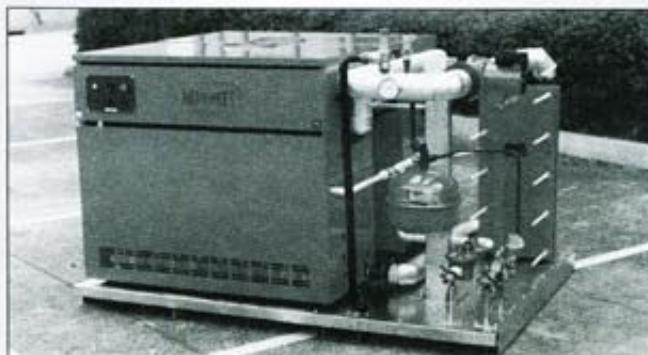

Family's successful transition from paint to cattle to grapes. Sonya
 Wiley. 433:23, 25-26.

Winery Design

A straw construction with a difference. (Special report). 437:10.
 Turning vine and wine into food, beverage and accommodation.
 Richard Brew. 433:33-34.

Winery Management

Managing staff in winery and vineyard locations. Simone Allen.
 424:27.
