

Annual Index

A catalogue of the major articles published in *The Australian & New Zealand Grapegrower & Winemaker* during 2002 Nos. 456-467

Australian Wine Business®

Anti-discrimination laws apply when hiring casuals, too. Ian Perrett. 457:69-70.

Brand infringements could lead to legal action. Mark Hamilton. 458:74-75.

Crisis management - forewarned is forearmed. Ian Perrett. 462:43, 117.

Exploring long-term relationships in the Eastern Australian wine industry. Peter J. Batt and Helen Wilson. 457:65-67.

Getting the ink to flow freely. Darriel Hutchinson. 456:79.

Privacy and employee use of technology. Ian Perrett. 456:78.

Prompt payment – now available for grapegrowers. David Yearsley. 457:68.

Stocktaking or stock taxing? Sean Cortis. 462:41-42.

The best employers to work for are also more profitable. Ian Perrett. 460:83.

Vineyards – cases affecting management and the hip pocket! Tricia Ross. 460:78-82.

Virtual Australian wine brands, Mark Hamilton. 461a:165-166.

When downsizing watch your Cs. Ian Perrett. 464:125-126.

When planning for the future, start with the 'five whys'. Ian Perrett. 465:98-99.

When you go, leave the mailing lists behind. Ian Perrett. 467:79

Where to now for the Australian wine industry? Steve Goodman. 465:95-97.

You can raise capital and still control your business. Ian Perrett. 458:71-73.

Youth versus maturity. Valerie Cranwell-Smith. 456:77

Bird Control (see Pest & Disease Management)

Blister Mite (see Pest & Disease Management)

Botrytis (see Pest & Disease Management)

Bottling, Labelling & Packaging

An argument for having your own wine bottling line. Paul Baggio. 463:65-66.

New EU wine label rules. Bruce Drinkwater. 463:63-64.

Reducing TCA levels with innovative cork screening tool. Dr. Ana Cristina Mesquita. 463:71-72.

The art of wine labelling. Greg Hanlon. 463:75-76.

The double take. Ian Kidd. 463:67-68.

To label or not to label for allergens – the latest question for winemakers. Creina Stockley and Robyn O'Hehir. 463:53-54, 57-58, 60-61.

Bud Mite (see Pest & Disease Management)

Cellar Door

Award-winning formulas for a successful cellar door. (Survey results). 457:48-53.

Building your cellar door. Allistair Lindsay. 463:100-101.

Cellar door – a strategic perspective. Wade Jarvis. 457:43-45.

Creating a cellar door strategy. Wade Jarvis. 459:96-98.

Extending the cellar door influence. Paul La Lacheur. 465:104-105.

Marketing wine to Generation-X consumers through the cellar door. Dr. Johan Bruwer. 467:66-70

Merchandise and customer service in the cellar door. Wade Jarvis. 461:66-67.

Pinot Noir and crayfish at the cellar door. Frank Smith. 465:107.

The importance and role of the winery cellar door in the Australian wine industry: some perspectives. Dr. Johan Bruwer. 463:96-99.

Trends in cellar door marketing in 2001. Paul Le Lacheur. 457:46-47.

What does a wine tourist look like? Wade Jarvis and Darina Hoffman. 467:72-77

Closures

A commentary on the AWRI closure report. John Casey. 459:65-69.

Compost (see Mulches)

Cover Cropping

Cover crops – are they a free ride? Kym Ludvigsen. 457:37-38.

Laying the groundwork for a successful cover crop – an Adelaide Hills outlook. Tom Ayers. 457:39-41.

Why would anyone grow a cover crop? Susan Byrne. 461:24.

Crown Gall (see Pest & Disease Management)

Crushing & Pressing

Controlled atmosphere pressing (CAP) at BRIT Winery – vintage trial summary. Mal Stewart. 461:55-56, 58.

Must get the juice from the grape. Frank Smith. 461:49-50.

Vaslin Bucher delivers new small tank press. George Willcox. 461:58.

Education & Training

A ripping good yarn from ParWill Swill. Jeff Williams. 462:100-101.

New tertiary wine science program for Victoria. Duncan McGillivray. 462:102-103.

Planning, people and success. Libby Boschen. 462:91

Environmental Management

BRL Hardy's Berri woodlot – a case study. Susie Olden. 467:62-65.

Designing an ecologically and environmentally sustainable vineyard. Di Davidson. 465:34, 36. ▶

Good things come in "3's" at Ausvat

1 BARREL RECLAIM

Don't throw money away! Reclaim sound oak from your barrels. Break your barrels down into staves for shipping. We can send FRESHLY TOASTED oak back to you.

New patented process! Used by leading wineries. PROCESS QUADRUPLES

OAKING SURFACE AREAS. Recovered oak equivalent to 60 tank staves or 8 sq.m./barrel of quality oak at a cost of \$2.50/tank stave recovered.

2 STAKVAT The only barrel in the world you can keep! Recycle your used Stakvat oak sides into clean sound oak. Reduce handling costs by 75%! Store 60% more wine in the same space occupied by expensive barrels.

3 OAK TANK STAVES & OAK BEANS Freshly toasted! Patented firing process! French, American OR Russian and Slovakian.

Come and see Peter or Kevin or contact us:

AUSVAT PTY LTD

7 Way Court, Willunga SA 5172

Ph: 08 8557 1022 F: 08 8557 1061

E: ausvat@chariot.net.au

Growers in SA's South-East spare a thought for groundwater AND winegrape quality. Sonya Logan. 467:58-59.

How do agrichemicals move in the environment, where do they end up, and do we need to know? Dr. Mahabubur Mollah and Alison MacGregor. 456:13-15.

Wastewater reuse on vineyards. Chris Davis. 467:60-61.

Winery waste water options. Frank Smith. 459:40-41.

Esca (see Pest & Disease Management)

Eutypa dieback (see Pest & Disease Management)

Fermentation Technology

Can nitrogen supplementation of primary fermentation contribute to mousiness? Mark Kelly and Robert Paul. 461a:125-126.

Extraction of red wine phenolics during fermentation: a new pectinase preparation. David Guerrand and Jean-Philippe Gervais. 466:60, 62-64.

Fermentabag – a saga of invention. Andrew Hickinbotham. 456:36-37.

GM yeasts have potential to add value to wine. Frank Smith. 466:52-53, 55.

Management of malolactic fermentation – wine flavour manipulation. Eveline Bartowsky, Peter Costello and Paul Henschke. 461a:7-8, 10-12.

Potential for yeast exploitation of proline in grape juice to facilitate fermentation completion. Kate Poole, Miguel de Barros Lopes and Vladimir Jiranek. 461a:121-123.

Using capacitance for rapid and reproducible estimation of live yeast cell mass during fermentation. John P. Carvell and Lino Oddi. 466:56, 58-59.

Winemaking properties of *Saccharomyces bayanus* – fermentation dominance. Jeff Eglinton and Paul Henschke. 466:47-51.

Filtration & Clarification

Cross flow microfiltration – how does it work? Gary Reeves. 459:57-58, 60. Integrity testing of membrane filters – practical considerations. Sean Wattam. 459:46-48, 50.

Lenticular cartridge filters in the winery – a contemporary perspective. Carmine Polzella. 461:62, 64-65.

Plant proteins for wine fining. Dr. Barbara Scotti. 459:53.

The changing nature of the clarification challenge. Richard Gibson. 459:43-45.

Flow Equipment

Piston pumps in the winery. Ian Paton. 456:80-83.

Frost

Frost protection systems – who needs 'em? Sonya Logan. 462:107-108.

Wind machine principles. Kim McAuley. 462:109-110.

Grape Varieties

A viticultural view of Viognier. (Special report). 467:36-38.

The evolution of Viognier in Australia. (Special report). 467:40-41.

Viognier: a New World perspective. (Special report). 467:42, 44.

Grapevine Leafroll Virus (see Pest & Disease Management and New Zealand Index)

History

Beginning of wine research in Australia and the role of the Waite Institute. Dr. Bryce Rankine. 462:33-38.

Index

Annual Index, 2001. 456:85-88.

Information Technology

Easing the paperwork burden of the export approval process. Steve Guy. 461:79.

Extolling the virtues of information technology for making good wine. Sonya Logan. 461:72-73.

Internet technologies and the grapegrower and winemaker. Jeannie Boone. 461:77-78.

Protecting intellectual property and business knowledge in the wine industry. Robyn M. Murphy. 461:75-77.

Winery management systems – some thoughts from a developer. David Wollan, Mark Kelly and Nic Baxter. 462:39-40.

Irrigation

Happy as a pig in Mudgee. Michael Porteus. 464:26.

Integration of rain gauges and probes capacitance for effective irrigation management. Ross Stewart and Gavin Wheatcroft. 467:28-29, 31.

Interactions between irrigation, salinity, leaching efficiency, salinity tolerance and sustainability. Rob Stevens. 466:71-76.

In the pursuit of quality. Jim Ross. 466:77.

Irrigation efficiency in drip-irrigated vineyards. Darren Ferber. 466:78-79, 81.

Irrigation systems provide boost for grapegrowing, winemaking and tourism in Hunter Valley. Michael Porteus. 461:13-15.

Physiological processes contributing to yield and water-use efficiency in grapevines. Mark R. Gibberd, Rob R. Walker and Peter R. Clingeffer. 466:86-89.

Pipeline sparks efficiency spiral. Michael Porteus. 467:24, 26, 28.

Soil moisture monitoring with gypsum blocks Part 1: Gypsum blocks as an irrigation scheduling tool. Peter Toome. 466:82-84.

Soil moisture monitoring with gypsum blocks Part 2: Interpreting tension readings. Peter Toome. 467:19-20, 23.

Special care needed with vine irrigation. Harry Creecy. 466:90.

The more the merrier! Sampling problems in soil moisture measurement. Andrew Skinner. 461a:152-154.

Using technology to grow quality winegrapes. Stephen Bicego. 456:21-22, 24-25.

Legal

OIV revisited – journalistic terrorist revisits infamous crime scene. Bruce Drinkwater. 456:26-27.

Mechanical Harvesting Equipment

A machine harvester made to order. Adam Jacobs. 456:45-46.

Increasing acreages and shrinking profits drives growth in mechanical harvesting. Bev Prideaux. 456:48-49.

Managing Young Vines

Defining the three alternatives for vineyard management post-planting. Bruce Humphery-Smith. 465:56-57.

Drought strategies for young vines. Kym Ludvigsen. 465:51-54.

Sampling young vine management practices in Australian viticulture. Sonya Logan. 465:58-62.

Manure (see Mulch)

Marc (see Mulch)

Mulch (see also Soil Management and New Zealand Index)

Don't be fooled! (Special report). 460:57.

Manures, mulches and composts – what's the difference? Fiona Wigg. 459:28-29.

On your marc! – Turning a potential liability into an asset. Frank Smith. 463:17-18.

The make-up of manure. Dr. Simon Lott. 459:29-31.

Using manure for crop production. Dr. Simon Lott. 460:54.

Nematodes (see Pest & Disease Management)

Oak

How wine barrels work. A.E. Flecknoe-Brown. 466:93-96.

Renewing oak flavours with inserts, oak chips and re-manufacturing. Bob Rogers. 462:51-52.

Roll out the recycled barrel. Frank Smith. 462:59-60.

The effect of different oak types on the sensory properties of a Chardonnay wine. Richard Gawel, Tony Royal and Peter Leske. 458:22-24.

Thoughts on oak – a Western Australian perspective. Beverley Prideaux. 462:54-56.

Organic Viticulture & Winemaking

Organic wine heads for the big time. Frank Smith, 464:17-18.

Overseas

Notes from a visit to a vineyard and winery in Hokkaido, Japan. Sharyn Rogers. 460:24-25.

People

Alan Young back home! Joy Walterfang. 465:77-79.

Pest & Disease Management

An effective new mode-of-action fungicide for powdery mildew control in vines. G.S. Wells, T. J. Wicks and C.J. Hitch. 461a:159-161, 163.

A note on the fungus causing white rot of grapevines in New South Wales. V. Sergeeva, L. Tesoriero, M. Priest and N.G. Nair. 461a:62-63.

Biological control of glassy-winged sharpshooter in California and the threat this insect poses to Australian and New Zealand grapegrowers. Mark S. Hoddle. 459:17-18, 20, 22.

Can phylloxera grow on your rootstocks? Angela Corrie, Robyn van Heeswijck and Ary Hoffmann. 461a:116-119.

Controlling botrytis: a perspective from the eastern USA. Wayne F. Wilcox. 465:22, 26-27.

Controlling powdery mildew: a perspective from the eastern USA. Wayne F. Wilcox. 464:83-87.

Cutting bird damage by 80% or more. Jim Savage. 456:83.

Developing a standardised sampling protocol for consistent detection of grapevine viruses by the PCR assay. Nuredin Habili and John W. Randles. 464:88-92.

Dusting sulphur: the forgotten chemical of Australian viticulture. 459:15-16.

Eutypa dieback: development of early diagnostic techniques. Richard Lardner, Noreen Mahoney, Russell Molyneux and Eileen Scott. 461a:78-79.

Evaluation of fungicides, paints and a biological product for the prevention of eutypa dieback of grapevines. M.L. Creaser and T.J. Wicks. 465:15-18.

First detection of a new virus, grapevine leafroll-associated virus type 9, in a popular clone of Cabernet Sauvignon in Australia. Nuredin Habili and Adib Rowhani. 461a:102-103.

First detection of grapevine leafroll virus types 2 and 5 in New Zealand by Waite Diagnostics. 459:23, 25-27.

Fungicides for cane and leaf spot control. Belinda Rawnsley and Trevor Wicks. 465:20.

Grapevine bud mite, RSG and blister mite: an emerging story. Martina Bernard, Melissa Carew, Pamela Hurst, Paul Horne and Ary Hoffmann. 464:41-43, 45-48.

Host suitability of grapevines to two species of lesion nematode from vineyard soils. Greg Walker and Craig Speirs. 464:66-67.

Hot water treatment of cuttings shows promise as protection against development of Petri disease. Jacqueline Edwards and Ian Pascoe. 464:53-54.

Infections extend below ground in vines severely affected by eutypa dieback. M.L. Creaser and T.J. Wicks. 461a:76-77. ▶

grapeworks

G-bung™ takes the art of sealing barrels four steps forward:

1. No more searching for the right sized bung – the G-bung™ fits different sized holes
2. Available in recessed, solid and fermentation versions
3. Quick glance colour coding
4. Flared top makes the G-bung™ quick and easy to remove, stops it being overdriven.

Australian designed and made from hi-tech food grade, colour fast silicon – the perfect partner for your barrels.

Little bird, big problem. Roger Bilney and Jane Fisher. 457:13.
 Managing bunch rot more effectively through understanding the epidemiology of botrytis. D.C. Mundy and R.M. Beresford. 461a:15-17.
 Nematode parasites in South Australian vineyards. Motiul Quader, Ian Riley and Greg Walker. 464:62-64.
 Phomopsis and Diaporthe – distinction of the two fungi associated with phomopsis cane and leaf spot. Belinda Rawnsley, Trevor Wicks, Eileen Scott and Belinda Stummer. 464:30-32, 34-35.
 Pierce's disease and the glassy-winged sharpshooter: understanding the threat and minimising the risks. Joanne Luck, David Letham, Simon McKirdy and Barbara Brown. 462:22-26.
 Post-harvest fungicide applications – are they worth the effort? Trevor Wicks, Bob Emmett, Catherine Hitch and Peter Magarey. 461a:156.
 Potassium metabisulphite at harvest – does it control botrytis bunch rot? T. Wicks, R. McMahon, K. Davies, C. Hitch and B. Hall. 464:77-78.
 Powdery mildew and grape and wine quality. B.E. Stummer, I.L. Francis, A.J. Markides and E.S. Scott. 464:68-69, 72, 74.
 Powdery mildew control – results of 2001-2002 trials. Trevor Wicks and Catherine Hitch. 464:58-60.
 Progress towards understanding and managing black goo decline (Petri disease) and esca. Jacqueline Edwards and Ian Pascoe. 461a:81-84, 86.
 Pruning wounds: to treat or not to treat? John S. Hunt. 461a:151.
 Resistance and tolerance of grapevine rootstocks to lesion nematode. Greg Walker and Craig Speirs. 464:51-52.
 Root-knot nematode quantification for management options in grapevines. Motiul Quader, Ian Riley, Herdina, Kathy Ophel-Keller and Greg Walker. 458:13-16.
 Short-term effects of remedial surgery to restore productivity to eutypa dieback-affected vines. M.L. Creaser and T.J. Wicks. 461a:73, 75.
 The development of powdery mildew in 2001-2002. Trevor Wicks and Catherine Hitch. 460:51.
 Tissue culture-based systems for assessment of rootstock resistance to root-knot nematodes. Tricia Franks, Sandra Savocchia and Robyn van Heeswijk. 461a:90-92.

Towards understanding weevils in vineyard ecology. Owen Seeman, Duncan Farquhar and Penny Domoney. 464:36, 38, 40.
 Validation of the Gubler-Thomas powdery mildew model. Shaun Luckhurst and Stuart Pettigrew. 464:94-97.
 Validation project of Gubler-Thomas powdery mildew model – preliminary findings. Shaun Luckhurst and Stuart Pettigrew. 457:18, 20.
 Why crown gall occurs and what can be done to manage it. Thomas J. Burr. 466:33-35.

Petri Disease (see Pest & Disease Management)

Phomopsis (see Pest & Disease Management)

Phylloxera (see Pest & Disease Management)

Pierce's Disease (see Pest & Disease Management)

Powdery Mildew (see Pest & Disease Management)

Pruning, Training & Trellising

Australian experience with traditional Old World vine densities. 460:38-40.
 Pruning: an essential part of every vineyard's operation. Kym Ludvigsen. 460:29-32.
 What trellis system do I choose? Adam Jacobs. 460:34-35, 37.

Refrigeration & Cooling

Barrel stores – smart looks and smart performance. Richard Harris. 465:45-46.
 How much refrigeration do I need? Trevor Delves. 465:39-40, 42.
 Refrigeration decisions. Noel Ireland. 465:47-48.
 Winery refrigeration – looking for efficiency? Brad Semmler. 465:42, 44.

Root-knot nematode (see Pest & Disease Management)

Rootstocks

A comparison between 140 Ruggeri and Schwarzmann rootstocks grafted to Chardonnay under hot climatic conditions. Tom Crossen and Mark Aitken. 461a:57-60.
 How do rootstocks control scion vigour and yield in grapevines? Jason Smith and Bruno Holzappel. 465:29-32.
 Soils of the Australian rootstock trials. Alfred Cass, Robert Fitzpatrick, David Maschmedt, Karin Thomson, Andrew Dowley and Susan Van Goor. 461a:40-42, 44-45, 47, 49.

Restricted Spring Growth (see Pest and Disease Management)

Soil Management

Creating the best environment for root growth and water infiltration. Ashley Wheaton. 461:21-24.
 Crop production – it's all in the soils you know. Dr. Simon Lott. 458:56.
 Digging for knowledge. Kym Ludvigsen. 461:25.
 Organic matter management in vineyards – mulches for soil maintenance. John C. Buckerfield and Katie A. Webster. 461:26-33.
 Vineyard microbial soil health. Dr. Melanie Weckert. 464:21-25.

Viewpoint

A great marketing opportunity for Australian wines forgone – Winemakers' Federation shoots producers in both feet. Erl Happ. 466:98-101.

Vine Health & Improvement

An overview from the National Vine Health Steering Committee. Dr. Bill Roberts and Dr. Prue McMichael. 459:87-90.
 Clones to improve wine quality. Simon Cowham. 459:91-92.
 Preliminary results from a MVVIS Merlot trial. 459:93-94.
 Source area management: avoiding cutting dehydration and good nursery management may be the keys to successful hot water treatment. John Crocker, Helen Waite, Paul Wright and Graeme Fletcher. 461a:33-35, 37.
 Tasmanian growers trial Pinot clone. (Special report). 460:58.

Vine Improvement Group Reports

An account of the activities of WAVIA during 2001. Chris Harding. 459:72-73.
 Cuttings of Chardonnay, Shiraz and Traminer from the MIAVIS up in 2001. Jeremy Cass. 459:76-77.
 Development of QVIA source blocks continues. Peter Watters. 460:58.

THERE CAN ONLY BE ONE ORIGINAL WIRE CARE CLIP®

...for the well managed vineyard. Nothing else comes close.

The Wire Care Clip® was designed and produced by viticulturists to meet the many demands faced in vineyard trellising. Conventional nails & staples used for wire trellising will corrode wires and are unable to bear heavy load strain.

The Wire Care Clip® overcomes these problems and has proved its worth in vineyards throughout Australia and America. Simple to install, its design allows 'over' or 'under' wire placement to accommodate undulating land & has a load bearing surface of 30mm². Don't be fooled by cheap imitations - inferior grade materials won't go the distance. The Wire Care Clip® is made from durable, UV resistant polyethylene ensuring a long lifespan.

THE ONE, THE ONLY, THE ORIGINAL

T H E **wire** care clip

Grapevine cuttings sold from South Australia in 2001. 459:80-81.
NZGVIG announces vine certification and nursery accreditation scheme. 459:78-79.

The national distribution of grapevine cuttings for 2001. Lou Cremasco. 459:70-72.

VAMVIA moving forward. Ryan Baddock. 459:74-75.

Vine improvement the professional way. Martin Lightfoot. 460:58.

Vine Nutrition

A balanced approach to vine nutrition. Adam Jacobs. 466:22, 25.

Grapevine fruitfulness and nutrition. Ben Robinson 466:26-27.

Nitrogen and irrigation management of *Vitis Vinifera* cv. Shiraz. Jessica Wade, Bruno Holzapfel, Kerry DeGaris and David Williams. 466:19-20.

Vineyard Spraying

Adoption of Unit Canopy Row by Orlando Wyndham Group. Louise Deed. 463:44-45.

A new fan for multi-head, air-assisted sprayers offers major improvements in disease and pest management. Geoff Furness. 463:35-36, 38, 40, 42-43.

Can spray adjuvants improve pesticide efficiency in viticulture? Bruce Dawson. 463:47-49.

Spray adjuvants: powerful tools to help protect grapes from pests and diseases. Robyn Gaskin and David Manktelow. 464:78-80.

Workshops improve spray application. John Lopresti. 460:56.

Vineyard Tractors

Tractors in the vineyard: not just a tool – a part of your business. John Fitzsimmons. 458:47-48, 50, 52.

Vintage Reports

2002 vintage report – red grapes soar. Winemakers' Federation of Australia. 463:25-26.

Red surge stamps its character on 2001. Lawrie Stanford. 457:26-28, 30.

Vintage 2002 – a preliminary assessment. Lawrie Stanford. 459:94.

Vintage 2002 – production reviewed upward and quality couldn't get better. Lawrie Stanford. 462:73-75.

Viticulture

February in the vineyard. Di Davidson. 457:23-25.

Crop loss 2002 – could it have been avoided? Sam Burton. 460:52-53.

Dam design and construction – some practical considerations. Daniel Watson. 461a:29-32.

Defining the sustainable vineyard. Gioia Small and Ron Hutton. 462:15-17.

Grape bunch exposure and aroma development. Erika Winter. 461a:127-129, 131-132.

Herbicide damage – what to do if it happens to you. Sam Burton. 466:38-39.

High temperatures, hot winds and bushfires – their effect on vines. Di Davidson. 458:18-19.

Is vineyard variability restricting improvement in winegrape quality? Brett Rosenzweig and Ben Brown. 461a:18-19, 21-22.

It's time to rise to the challenge. Di Davidson. 461:17-18.

Maximising the chances of getting fruit ripe. Di Davidson. 456:16, 18.

On Farm Trials – progress and emerging issues. Natalie Laukart and Daryl Joyce. 461a:94-96.

Shiraz shrivel update. Nicole F. Dimos, Suzy Rogiers, Dennis Greer, John Gray and Rosemary White. 466:31-32.

Thinking of buying a vineyard? Do your due diligence well. Di Davidson. 464:27.

The drain paradox: draining water improves drought tolerance. Frank Smith. 467:17-18.

Tightening your vineyard business. Di Davidson. 463:20, 22.

Using soil and petiole testing in winegrape management. Simon Leake. 465:18-20.

Vineyard contractors and contract managers – their obligations. Di Davidson. 459:32-33.

Viticare project gains momentum: Participatory On Farm Trials For Sustainable Viticulture. 457:14-17.

Weed Control (see Soil Management)

Weevils (see Pest & Disease Management)

Wine & Health

Consumer health and safety issues related to the dietary intake of sodium – wine consumption in perspective. Creina Stockley. 461a:136-140, 142.

Proposed trial to examine the effect of red wine on cardiovascular risk in type 2 diabetic patients. Dr. Trevor A. Mori and Professor Ian B. Puddey. 465:82-83.

Red wine: good or bad for cardiovascular health? Dr. Sebely Pal. 465:90-93.

Wine consumers have reduced cardiovascular risk through improved insulin sensitivity and reduced plasma homocysteine. John B. Dixon and Paul E. O'Brien. 465:85-86, 88.

Wine Exports

An update on efforts to improve access to export markets for Australian wine. Leanne Stewart. 465:111-112.

Australian wines do battle with influx of cheap imports onto Japanese market. Yasushi Kimura. 458:37-38, 40.

Danish market demonstrates very high growth potential for Australian wines. Jay Andersson. 458:34, 36.

Exporting wine to Asia. Frank Smith. 467:81-83

Germany shows 'big potential' for Australian wines. Sonya Logan. 464:99-100.

Growing the promotional push. Jonathan Scott. 456:48.

Minimising wine spoilage during transport and storage. Andrew Dean and Patrick Paffard. 460:63-66.

Notes from the USA. Jan Stuebing. 459:83-84.

Power tracking: making the party larger. Greg Homonylo. 458:29-30.

Small Hunter Valley winery makes its mark on the export stage. Sonya Logan. 462:45-46.

Still scope for growth in the UK market. Hazel Murphy. 458:32.

World trade barriers don't make it easy for Australia's wine exporters. (Special report). 466:119-120. ▶

WIRELESS IRRIGATION CONTROL

- The Octet solar-powered receiver can switch up to 8 DC latching irrigation solenoids.
- Set up as a transceiver it can send back 8 contact closures from Murphy soil moisture switches.
- You can control it from a PC with Windows-based irrigation software.
- Or you can run it from an irrigation controller with an inbuilt radio transmitter.
- It's Australian made and does not require a radio licence.
- System pricing from \$2800 + GST.
